

CHECKPOINT: Managing the Test Activities

Risk Identification

High-Risk Areas (Test First)

These affect core business functionality:

- Checkout/Payment Failure
 - Payment button not responding - Revenue loss risk
- Basket Functionality Issues
 - Cannot remove items - Poor user experience
 - Quantity logic unclear - risk of cart/basket Limit
- Navigation Issue (Show Details)
 - Wrong redirection - User confusion / broken journey

Medium Risks

- Contact Form Feedback Missing
 - No success/error message - usability issue
- Product Quantity Handling
 - Multiple clicks increase the price without clear quantity control

Exploratory Testing

Key Exploratory Scenarios:

Basket Exploration

- Add the same product multiple times
- Try removing the product (if possible)
- Refresh page - check persistence
- Navigate away and back

Payment Exploration

- Click the payment multiple times
- Try different browsers
- Check console errors (if possible)
- Try empty basket payment

Navigation Exploration

- Click **Show Details** on different products

Contact Form Exploration

- Submit empty form
- Enter an invalid email
- Submit valid data
- Click send multiple times

Formal Testing Techniques Applied

Equivalence Partitioning (EP) – Contact Form

Test Case ID	Input Condition	Test Data	Expected Result	Status (Based on Observation)
EP_001	Valid Input	Name: Theophilus, Email: ogheneyoleilaya@gmail.com, Message: Testing Hello	Form should submit successfully with a success message	Fail (No feedback shown)
EP_002	Invalid Email	Name: Theophilus, Email: ogheneyoleilaya@.com, Message: Hello	Error message/Validation should be displayed	Pass (validation message appears)

EP_003	Empty Fields	Name: "" or Email: "", Or Message: ""	Validation messages should appear	Pass (validation message appears)
--------	--------------	---	---	--------------------------------------

Boundary Value Analysis (BVA) – Basket Quantity

Test Case ID	Boundary Condition	Test Action	Expected Result	Actual Result	Status
BVA_001	Minimum (1 time)	Add product once	Product added with correct price	Works correctly	Pass
BVA_002	Product Combination(multiple times)	Add Different product combination	Products added with correct price	Works correctly	Pass
BVA_003	Maximum (multiple times)	Add product many times	Quantity should increase with clear count	Multiple Qty added successfully	Pass
BVA_003	Maximum Product limit (50 product in a basket)	Add product many times	Quantity should be restricted	Basket Quantity surpasses the max limit	Fail

Decision Table Testing – Payment Scenario

Basket Has Items	Payment Clicked	Expected Result	Actual Result	Status
Yes	Yes	Payment should be successful	No response	Fail
No	Yes	Error message should display	No response	Fail
Yes	No	No Action	No Action	Pass

State Transition Testing – Basket Flow

Current State	Action	Next State (Expected)	Actual State	Status	Remark
-	Add Product	Updated (item added)	Updated	pass	Works
Updated	Remove Product	Empty	Remains Updated	Fail	No quantity control
Updated	Add More Products	Updated (quantity increases)	Updated (price and Qty increases)	Partial	No quantity control

Use Case Testing – End-to-End Flow

Step	Action	Expected Result	Actual Result	Status
1	View product	Product displayed	Product displayed	Pass
2	Add to basket	Product added successfully	Product added	Pass
3	Go to basket	Basket shows selected product	Product displayed	Pass
4	Click payment	Payment process initiated	No response	Failed

Exploratory Test Cases & Execution

Test Case 1: Verify “Show Details” Navigation

- Test Case ID: TC_NAV_001
- Title: Verify that "Show Details" opens correct product details
- Module: Home Page
- Precondition: User is on homepage

Steps & Expected Result

Step	Action	Expected Result
1	Open homepage	Page loads successfully

2	Click "Show Details" on any product	Product detail page for selected product opens
---	-------------------------------------	--

Execution

Step	Actual Result	Status	Comment
1	Homepage loaded	Pass	-
2	Redirected to All products page	Fail	Wrong navigation

Test Case 2: Add Product to Basket

- Test Case ID: TC_CART_001
- Title: Verify user can add product to basket
- Module: Product Page

Steps & Expected Result

Step	Action	Expected Result
1	Navigate to Products page	Product list displayed
2	Click "Add to Basket"	Product added with success message

Execution

Step	Actual Result	Status	Comment
------	---------------	--------	---------

1	Product page displayed	Pass	-
2	Product added successfully	Pass	Success message shown

Test Case 3: Remove Product from Basket

- Test Case ID: TC_CART/BASKET_002
- Title: Verify user can remove product from basket
- Module: Basket

Steps & Expected Result

Step	Action	Expected Result
1	Add product to basket	Product added
2	Navigate to Basket	Product visible
3	Click remove/delete	Product removed

Execution

Step	Actual Result	Status	Comment
1	Product added	Pass	-

2	Product visible	Pass	-
3	No remove option available	Fail	Feature missing

Test Case 4: Verify Payment Functionality

- Test Case ID: TC_PAY_001
- Title: Verify user can complete payment
- Module: Basket / Checkout

Steps & Expected Result

Step	Action	Expected Result
1	Add product to basket	Product added
2	Go to Basket page	Basket displayed
3	Click Payment button	Payment process initiated

Execution

Step	Actual Result	Status	Comment
1	Product added	Pass	-

2	Basket page displayed	Pass	-
3	No response on click	Fail	Critical issue

Test Case 5: Verify Multiple Product Addition

- Test Case ID: TC_CART/BASKET_003
- Title: Verify system handles multiple additions correctly
- Module: Basket

Steps & Expected Result

Step	Action	Expected Result
1	Add same product multiple times	Quantity increases clearly
2	View basket	Quantity and total price correct

Execution

Step	Actual Result	Status	Comment
1	Product added multiple times	Pass	
2	Price multiplies as quantity Increases	Pass	

Test Case 6: Contact Form Submission

- Test Case ID: TC_CART/BASKET_004
- Title: Verify basket/cart limit
- Module:Products/Basket

Steps & Expected Result

Step	Action	Expected Result
1	Add same product multiple times for Product >= 100	At Quantity >= 101, system notify user on Basket Limit
2	View basket	Basket Quantity should be <= 100

Execution

Step	Actual Result	Status	Comment
1	Allowed Product addition multiple times was > 100 with no Limit notification information	Fail	No Informative notification for Basket Limit boundary was implemented
2	Basket QTY > 100	Fail	Basket Limit boundary was implemented

Test Case 7: Contact Form Submission

- Test Case ID: TC_CONTACT_001
- Title: Verify contact form submission feedback
- Module: Contact Page

Steps & Expected Result

Step	Action	Expected Result
1	Fill all fields	Data entered
2	Click Send	Success message displayed

Execution

Step	Actual Result	Status	Comment
1	Fields filled	Pass	
2	Page refreshes, no message	Fail	No feedback

Bug Reports

Bug 1: "Show Details" Redirect Issue

- Title: Show Details button redirects to the wrong page
- Module: Home Page / Navigation
- Steps to Reproduce:
 - 1. Open homepage
 - 2. Click Show Details on any product

- Expected Result:
The user should see the details of the selected product
- Actual Result:
Redirects to the generic Product page
- Severity: Medium
- Priority: Low

Bug 2: Cannot Remove Product from Basket

- Title: No option to remove product from basket
- Module: Basket
- Steps:
 1. Add product to basket
 2. Go to basket page
- Expected Result:
User should be able to remove item
- Actual Result:
No remove/delete option available
- Severity: High
- Priority: Medium

Bug 3: Payment Button Not Responding

- Title: Payment button not functioning
- Module: Basket / Checkout
- Steps:
 1. Add product to basket
 2. Navigate to basket
 3. Click Payment
- Expected Result:
Payment process should initiate
- Actual Result:
No response
- Severity: Critical
- Priority: High

Bug 4: Product Quantity Handling Issue

- Title: Product price multiplies without quantity control
- Module: Basket
- Steps:

1. Add same product multiple times
- **Expected Result:**
Quantity should be visible and controlled
 - **Actual Result:**
Price multiplies with no clear quantity indicator
 - **Severity:** High
 - **Priority:** Medium

Bug 5: Contact Form No Feedback

- **Title:** No success/error message after submitting contact form
- **Module:** Contact Page
- **Steps:**
 1. Fill form
 2. Click Send
- **Expected Result:**
Success or error message displayed
- **Actual Result:**
Page refreshes silently
- **Severity:** Medium
- **Priority:** Low
