

PRESTASHOP FRONT OFFICE TEST CASE DOCUMENT

Application Under Test: PrestaShop Demo Front Office

Testing Type: Functional, UI, Usability, Responsive, Negative, Regression Testing

Browsers: Google Chrome, Microsoft Edge

Devices: Desktop, Tablet, Mobile

URL under Test: <https://demo.prestashop.com/?view=front#/en/front>

MODULE 1: HOMEPAGE TESTING											
TC ID	Test Name	Description	References	Test Setup	Prerequisites	Test Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
HOME_001	Verify homepage loads successfully	Verify that the PrestaShop front office homepage loads completely without broken UI elements, script errors, or missing content.	PrestaShop Demo Front Office	Launch a supported browser (Chrome/Edge) and connect to the internet.	The browser is installed, and a stable internet connection is available.	Open the application URL	Homepage loads without errors	The front end demo site resolves quickly. Frame handles responsiveness. No standard HTTP console errors.	PASS	High	Checked on desktop layout view.
HOME_002	Verify logo visibility	Verify that the store logo is visible on the homepage header and properly rendered.	PrestaShop Demo Front Office	Open the PrestaShop demo homepage in a supported browser.	User successfully accessed the homepage.	Observe the top-left section	The store logo should display properly	The default branding logo renders with sharp resolution in the top-left structural header block.	PASS	Medium	
HOME_003	Verify homepage banner carousel	Verify that the homepage banner slider rotates correctly when navigation arrows are clicked.	PrestaShop Demo Front Office	Open the homepage and ensure banner images are visible.	The homepage is fully loaded.	Click the next/previous arrows on the slider	Banner images should rotate correctly	Banners cycle instantly upon clicking the chevron indicators. Sliding transitions execute	PASS	Medium	

MODULE 1: HOMEPAGE TESTING											
								fluidly.			
HOME_004	Verify featured products display	Verify that featured products are displayed with their product images, names, and prices on the homepage.	PrestaShop Demo Front Office	Launch the browser and navigate to the homepage.	The homepage is accessible and loaded completely.	Scroll through the homepage	Featured products should display with images and prices	"Popular Products" grid populates accurately. Each item reveals crisp imagery, localized currency pricing (\$), and clean text cards.	PASS	High	verified elements: item titles, standard pricing layout structures.
HOME_005	Verify navigation menu	Verify that navigation menu links redirect users to the appropriate category or section pages.	PrestaShop Demo Front Office	Open the PrestaShop demo homepage in a supported browser.	The homepage is loaded successfully.	Click menu categories	The user should navigate to the selected category page	Categories process mouse interactions perfectly. Clicking links redirects smoothly to matching filtered gallery pages.	PASS		Ok

MODULE 2: USER REGISTRATION											
TC ID	Test Title	Description	References	Test Setup	Prerequisites	Test Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
UREG_001	Verify the Create Account page loads successfully	Verify that the account registration page loads correctly and displays all required registration fields and controls.	PrestaShop Demo Front Office	Launch a supported browser (Chrome/Edge) and navigate to the Sign-up/Create Account page.	User is on the Sign up page.	1. Open the registration page. 2. Observe all form fields	- Page loads successfully. - All fields are visible (Social Title, First Name, Last Name, Email, Password, Birthdate, Checkboxes, Sign up button).	The registration page completely loads the layout frameworks. All requested form inputs are visible in standard view.	PASS	High	Standard structural layout elements are verified intact.

Module 2: User Registration											
UREG_002	Verify Social Title selection	Verify that users can select only one social title option at a time during registration.	PrestaShop Demo Front Office	Open the registration form in a supported browser.	The registration form is accessible.	1. Open form. 2. Select "Mr." 3. Select "Mrs."	- Only one option can be selected at a time. - Selected option is highlighted.	Interacting with standard Radio options works on exclusive select rules. Activating one choice switches the highlight off the other.	PASS	Medium	Managed as expected HTML radio structures.
UREG_003	Validate First Name field (valid input)	Verify that the First Name field accepts valid alphabetic input without validation errors.	PrestaShop Demo Front Office	Open the registration form.	User is on the Create Account page.	1. Enter Theo. 2. Submit form.	- Accepts input. - No validation error.	Text input engine accepts alphanumeric string data cleanly. Validation flags do not alert.	PASS	High	Input successfully transitions state cleanly.
UREG_004	Validate First Name field (invalid input)	Verify that invalid characters and numbers are rejected in the First Name field.	PrestaShop Demo Front Office	Open the registration form.	User is on the Create Account page.	Test Data: Theo123, @Theo, Theo!	- display an Error message - Form submission blocked.	System actively triggers string formatting warnings. Submissions halt execution immediately on focus exit.	PASS	High	
UREG_005	Validate Last Name field rules	Verify that the Last Name field accepts only valid characters such as letters, spaces, and dots.	PrestaShop Demo Front Office	Open the registration form in a browser.	The registration page is loaded successfully.	1. Enter Ilaya. 2. Enter Ilaya123.	- Accepts only letters, dot (.), and space. - Rejects numbers and special characters.	Ilaya. submits smoothly. Processing string Ilaya123 prompts system inline warning validation logs.	PASS	Medium	Follows core regex boundary settings.
UREG_006	Verify Email field validation	Verify that the Email field validates proper email address formats and rejects invalid formats.	PrestaShop Demo Front Office	Launch the browser and open the registration page.	User is on the account creation page.	Test Data: - user@example.com (valid) - userexample.com (invalid) - user@.com (invalid)	- Valid email accepted. - Invalid email shows an error message.	Structured email fields successfully register. Broken text strings are rejected with a standard formatting warning tag.	PASS	High	Regulated through default browser/form handling blocks.

Module 2: User Registration											
UREG_007	Verify Password field	Verify that the Password field masks entered characters and accepts a valid password format.	PrestaShop Front Office	Open the Create Account form.	The registration form is accessible.	1. Enter password Test@1236.	- Password is masked. - Accepts valid password format. - Enforces strength requirements if rules exist	Text fields render under dot masking. Selecting the optional eye icon reveals the string safely. Format specifications approve the security structure.	PASS	High	The optional client complexity guidelines function well.
UREG_008	Verify the birth date field format	Verify that the Birthdate field accepts only a valid MM/DD/YYYY date format.	PrestaShop Front Office	Open the registration form in a browser.	User is on the Sign-up page.	1. Enter 05/31/1970. 2. Enter an invalid format 31-05-1970.	- Accepts only MM/DD/YYYY format. - Invalid format rejected with an error.	The field parses structure dynamically against localized format markers (e.g., YYYY-MM-DD or locale choice). Wrong placements trigger format blocks.	PASS	Medium	Locale-based validation applied
UREG_009	Verify Birth date is optional	Verify that users can complete registration without entering a birthdate value.	PrestaShop Front Office	Open the registration page.	All required fields except Birthdate are filled correctly.	1. Leave Birthdate empty. 2. Submit form.	Form submits successfully (if all required fields are valid).	Skipping input processing doesn't stop account completion, leaving column fields safe to bypass.	PASS	Medium	Confirmed birthdate is structurally optional by default.
UREG_010	Verify Terms and Conditions checkbox	Verify that registration cannot proceed unless the Terms and Conditions checkbox is selected.	PrestaShop Front Office	Open the account registration form.	User has entered valid registration details.	1. Leave the checkbox unchecked. 2. Try to sign up.	- Error message displayed. - User cannot register without accepting terms.	Form action interrupts with an alert notice banner. Final submission path remains blocked.	PASS	High	Explicit sign-off rule checks correctly.
UREG_011	Verify Newsletter checkbox	Verify that newsletter subscription selection does not affect account registration success.	PrestaShop Front Office	Open the Sign-up page.	User entered all mandatory registration details.	1. Check/Uncheck "Sign up for newsletter". 2. Submit form.	- Registration succeeds regardless of selection. - Preference is saved correctly	The registration process pipeline completes natively with or without opting in to notifications.	PASS	Medium	Verified value parses state accurately into DB storage.

Module 2: User Registration											
UREG_012	Verify Partner Offers check box	Verify that selecting or deselecting partner offers option does not impact registration completion.	PrestaShop Demo Front Office	Open the registration form in a supported browser.	Required registration fields are completed.	1. Check/Uncheck "Receive offers from partners". 2. Submit form.	• Preference stored correctly. • No impact on registration success.	Choosing third-party partner marketing paths does not interfere with the base validation sequence.	PASS	Medium	Independent boolean settings map accurately.
UREG_013	Verify successful registration	Verify that a new user account can be created successfully with valid details.	PrestaShop Demo Front Office	Launch the browser and navigate to the registration page.	User has valid registration details available.	1. Fill all valid fields. 2. Accept terms. 3. Click "Sign up".	• Account created successfully. • User redirected to account/dashboard page or login confirmation.	Application state successfully. User lands on active profile page containing welcome dashboard panels.	PASS	High	Baseline registration happy-path operates cleanly.
UREG_014	Verify the already registered email	Verify that the system prevents duplicate account creation using an already registered email address.	PrestaShop Demo Front Office	Open the Create Account page in the browser.	Existing registered email account is available.	Verify the already registered email	• Error message: "Email already registered".	Form submission halts, and a top alert banner returns: "The email is already used, please choose another one or sign in".	PASS	High	Core business rules handle duplicate validation flags smoothly.
UREG_015	Verify Sign-in link	Verify that the Sign-in link redirects users to the login page successfully.	PrestaShop Demo Front Office	Open the registration page.	User is on the Create Account page.	1. Click "Already have an account? Sign in".	• User redirected to login page.	Redirect link evaluates click instantly, dropping the session context onto the primary sign-in form.	PASS	Medium	Path links verify perfectly.

Module 3: Authentication/Reset Testing											
TC ID	Test Title	Description	References	Test Setup	Prerequisites	Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
USL_001	Verify the Sign In page loads successfully	Verify that the Login page loads properly and displays all required login elements.	PrestaShop Demo Front Office	Launch a supported browser (Chrome/Edge) and navigate to the Login page.	User is on the landing page.	1. Open the Login page. 2. Observe all form elements.	• Page loads successfully. • Elements visible: Email field, Password field, "Sign in" button, "Forgot password" link, and "No account?" link.	Login page components parse cleanly. Form labels, text boxes, CTA button, and helper links	PASS	High	

MODULE 3: AUTHENTICATION/RESET TESTING											
								are fully interactive.			
USL_002	Validate Sign In with valid credentials	Verify that users can successfully login using valid registered credentials.	PrestaShop Demo Front Office	Open the Login page in a supported browser.	User has an active account.	1. Enter a valid registered email. 2. Enter a valid password. 3. Click "Sign in".	- Produces a Success message. - User redirected to dashboard/home page.	Session initializes seamlessly. Application bypasses form state and lands user safely on "My Account" portal overview.	PASS	High	Happy path user session verified cleanly.
USL_003	Validate Sign In with an invalid password	Verify that the system rejects login attempts with incorrect passwords.	PrestaShop Demo Front Office	Launch the browser and navigate to the login page.	User has an active account.	1. Enter a valid registered email. 2. Enter the wrong password. 3. Click "Sign in".	- Produces an error message. - User remains on login page.	Red banner alert throws notice : "Authentication failed." Form submission terminates, keeping the current context on screen.	PASS	High	Session generation was correctly rejected by the system.
USL_004	Validate Sign In with a non-existent email	Verify that login is blocked when an unregistered email address is used.	PrestaShop Demo Front Office	Open the login page in a supported browser.	Email is not registered.	1. Enter an unregistered email. 2. Enter any password. 3. Click "Sign in".	Error message displayed: "Account does not exist," or "Invalid email or password," or any user-friendly error message.	Red alert box blocks transaction with standard notice string : "Authentication failed." Safe error patterns prevent credential scraping.	PASS	High	Secure, generic messaging handles the failure state.
USL_005	Verify mandatory field validation	Verify that the system validates empty mandatory login fields before submission.	PrestaShop Demo Front Office	Navigate to the Login page.	The login form is displayed.	1. Leave Email and Password empty. 2. Click "Sign in".	- The system should validate the empty mandatory field with a necessary message. - Submission blocked.	Local browser elements pop up validation tips (e.g., "Please fill out this field"),	PASS	High	

MODULE 3: AUTHENTICATION/RESET TESTING											
								haltin g data relay upstre am.			
USL_006	Verify Password masking	Verify that entered password characters are hidden for privacy and security.	PrestaShop Front Office	Open the login page in a supported browser.	The password field is visible on the Login form.	1. Type characters into the Password field.	Characters are hidden/masked (displayed as dots or asterisks) for privacy.	Standard bullet characters mask all incoming text inputs. The optional "Show" context toggle exposes a string on user click.	PASS	Medium	
USL_007	Verify "No account?" redirection	Verify that clicking the "No account?" link redirects the user to the account registration page.	PrestaShop Front Office	Open the login page.	User is on the Sign In page.	1. Click on the "No account?" link.	User is immediately redirected to the Create Account (Registration) page.	Action resolves routing changes seamlessly, loading blank structural elements of the registration matrix page.	PASS	Medium	Relative routing link verified as intact.
USL_008	Verify Forgot Password link navigation	Verify that clicking the "Forgot password?" link redirects users to the password recovery page.	PrestaShop Front Office	Open the login page in a browser.	User is on the Login page.	1. Click on the "Forgot password?" link.	User is redirected to the password recovery page.	Context transitions immediately to the standalone password retrieval utility dashboard (?controller=password).	PASS	High	Target redirection path evaluates correctly.
USL_009	Validate Forgot Password form (Valid)	Verify that users can request a password reset using a valid registered email address.	PrestaShop Front Office	Navigate to the Forgot Password page.	Registered user email is available.	1. Navigate to the Forgot Password page. 2. Enter a registered email. 3. Click "Submit/Reset".	- System displays success message: "Password reset link sent to your email". - Recovery email is triggered.	Green flash banner alert displays feedback notice: "If this email address has been registered, you will receive a	PASS	High	Email template payload schedules to delivery queue.

Module 3: Authentication/Reset Testing											
								link..."			
USL_010	Validate Forgot Password form (Invalid)	Verify that invalid email formats are rejected on the Forgot Password page.	PrestaShop Demo Front Office	Open the Forgot Password page in the browser.	User is on the password recovery page.	1. Enter an invalid email format (e.g., test.com). 2. Click "Submit/Reset".	- display a valid error Message or "Please enter a valid email address". - Reset process is blocked.	Client field highlights error state. Clicking reset triggers a validation alert banner, freezing workflow execution.	PASS	High	Invalid formats are captured prior to transmission.

Module 4: User Account (Profile) Testing											
Test Case ID	Title	Description	References	Test Setup	Prerequisites	Test Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
TC_ACC_001	Verify the user can access the Information section	Verify that logged-in users can successfully access the Information/Profile section from their account dashboard.	PrestaShop Demo Front Office	Launch a supported browser and log in to a valid user account.	User is logged in	1. Login2. Open User Account3. Click the Information link	The information page should open successfully	Page opened successfully	Pass	High	OK
TC_ACC_002	Verify that the user can update their profile without password fields	Verify that users can successfully update profile information without entering password details.	PrestaShop Demo Front Office	Open the Information/Profile page after login.	User is on the Information page	1. Edit profile fields (excluding password) 2. Click Save	Changes should be saved successfully	Save failed due to the password field requirement	Fail	Critical	BUG
TC_ACC_003	Verify that Password fields are not part of the profile update form	Verify that the password and new password fields are separated from the profile information update form.	PrestaShop Demo Front Office	Navigate to the Information page.	User on the Information page	1. Open Information form	Password and New Password should not be part of the profile edit form	Password fields are present	Fail	High	BUG

MODULE 4: USER ACCOUNT (PROFILE) TESTING											
TC_ACC_004	Verify password change is handled separately	Verify that password update functionality is managed through a dedicated password management module or page.	PrestaShop Demo Front Office	Log in with valid credentials.	User logged in	1. Attempt profile update	Password change should be in a separate page/module	Password included in the same form	Fail	High	BUG
TC_ADDR_001	Verify the Add First Address functionality	Verify that users can open the address creation form from the account section.	PrestaShop Demo Front Office	Log in and navigate to the Addresses section.	User logged in	1. Click Add First Address	The address form should open	Form opened successfully	Pass	High	OK
TC_ADDR_002	Verify First Name and Last Name redundancy	Verify whether First Name and Last Name fields are unnecessarily duplicated in the address form.	PrestaShop Demo Front Office	Open the Address form page.	User on Address form	1. Observe form fields	Fields should not be required again	Fields still present	Fail	Medium	Design Issue
TC_ADDR_003	Verify Country field placement	Verify that the Country dropdown is positioned before the State field for proper address flow.	PrestaShop Demo Front Office	Open the Address form in the browser.	User on Address form	1. Observe form layout	The country should appear before the state	Incorrect order	Fail	Low	Design Issue
TC_ADDR_004	Verify Zip/Postal Code placeholder	Verify that the Zip/Postal Code field contains a placeholder or hint guiding valid format entry.	PrestaShop Demo Front Office	Open the Address form page.	User on Address form	1. Check the Zip/Postal Code field	Placeholder should guide format input	No placeholder found	Fail	Low	Design Issue
TC_ADDR_005	Verify Address creation and save	Verify that users can successfully create and save a new address using valid mandatory details.	PrestaShop Demo Front Office	Open the Add Address form after login.	User fills the address form	1. Fill mandatory fields. Click Save	The address should be saved successfully	Address saved successfully	Pass	Critical	Save was successful

MODULE 4: USER ACCOUNT (PROFILE) TESTING											
TC_ADDR_006	Verify Address edit functionality	Verify that users can modify and save changes to an existing address successfully.	PrestaShop Demo Front Office	Existing address available in user account.	Existing address present	1. Click Edit2. Modify details. Save	Changes should be updated successfully	Update successful	Pass	High	Ok
TC_ORD_001	Verify Order History records display	Verify that previous customer orders are listed correctly in the Order History section.	PrestaShop Demo Front Office	Login and navigate to Order History page.	User has past orders	1. Click Order History	Orders should be listed correctly	Orders displayed successfully	Pass	High	Ok
TC_ORD_002	Verify Order Details functionality	Verify that users can view detailed information about a selected order.	PrestaShop Demo Front Office	Open Order History section.	Order history available	1. Click the Details button	Order details should display correctly	Details displayed correctly	Pass	High	Details were clearly represented
TC_ORD_003	Verify Reorder functionality redirects to checkout	Verify that selecting Reorder redirects users to the checkout/cart process with selected items added.	PrestaShop Demo Front Office	Login and access Order History.	Order exists	1. Click Reorder	User should be redirected to checkout	Redirect successful	Pass	Critical	redirect to checkout was smooth
TC_ORD_004	Verify price consistency during reorder	Verify that reordered products follow the correct pricing rules when prices have changed over time.	PrestaShop Demo Front Office	Existing order with changed product price available.	Product price changes over time	1. Reorder the same product	Price should reflect the correct rule (current or original pricing policy)	Price inconsistency suspected	Blocked	High	Not Sure of the Logic
TC_CS_001	Verify the availability of Credit Slips information	Verify that the Credit Slips page displays available credit information or an appropriate empty state.	PrestaShop Demo Front Office	Login and navigate to Credit Slips section.	User logged in	1. Click Credit Slips	Credit slip data should display an empty state	No information displayed	Pass	Low	Page Display with no record available info

MODULE 4: USER ACCOUNT (PROFILE) TESTING											
TC_ALERT_001	Verify My Alerts page content	Verify that the My Alerts section displays available alerts or an empty state when no alerts exist.	PrestaShop Demo Front Office	Login with valid user credentials.	User logged in	1. Click My Alerts	Alerts or empty state should display	No information available	Pass	Low	Page Display with no record available info
TC_GDPR_001	Verify GDPR data page content	Verify that GDPR-related account privacy and data management options are displayed properly.	PrestaShop Demo Front Office	Login and open GDPR section.	User logged in	1. Open GDPR section	GDPR options should display	Page displayed correctly	Pass	High	Page Display with no record available info
TC_GDPR_002	Verify Download data as CSV	Verify that users can successfully download their account data in CSV format from the GDPR section.	PrestaShop Demo Front Office	Navigate to GDPR page after login.	User on GDPR page	1. Click Get CSV	The file should download successfully	Download successful	Pass	High	Fine
TC_GDPR_003	Verify Download data as PDF	Verify that users can successfully download their account data in PDF format from the GDPR section.	PrestaShop Demo Front Office	Navigate to GDPR page after login.	User on GDPR page	1. Click Get PDF	The file should download successfully	Download successful	Pass	High	Fine

USER ACCOUNT (PROFILE) DEFECT SUMMARY				
Defect ID	Module	Description	Severity	Status
BUG_005	User Profile	The Password and New Password fields are incorrectly included in the profile update form instead of the separate password module	Critical	Open
BUG_006	Address Book	First Name and Last Name fields are redundant on the address creation form for logged-in users	Medium	Open
BUG_007	Address Book	Incorrect field order: Country should appear before State	Low	Open
BUG_008	Address Book	Zip/Postal Code field missing placeholder guidance	Low	Open
BUG_009	Order History	Reorder pricing behavior is unclear/inconsistent when product price changes over time	High	Open

MODULE 5: SEARCH FUNCTIONALITY										
TC ID	Title	Description	References	Test Setup	Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
SEARCH_001	Verify search with a valid keyword	Verify that the search functionality returns relevant products when a valid keyword is entered.	PrestaShop Demo Front Office	Launch a supported browser (Chrome/Edge) and open the homepage search bar.	Search for a shirt	Matching products should display	Search results page loads instantly, showing product listings matching the keyword (e.g., "Hummingbird printed t-shirt").	PASS	High	Matches item categorization dynamically.
SEARCH_002	Verify invalid keyword search	Verify that the system displays an appropriate message when no products match the search keyword.	PrestaShop Demo Front Office	Open the PrestaShop homepage and access the search feature.	Search random text	The "No results found" message should display	No search results for "BXYTs123."	PASS	High	Properly returns zero matched database queries.
SEARCH_003	Verify special character handling	Verify that the search functionality handles special character inputs securely and without application errors.	PrestaShop Demo Front Office	Open the PrestaShop homepage and access the search feature.	Enter @#\$%^	System handles input gracefully	Site loads safely without throwing raw SQL syntax errors or 500 server crashes. It converts strings cleanly and yields zero product matches.	PASS	Medium	

MODULE 6: PRODUCT FILTER FUNCTIONALITY											
Test Case ID	Title	Description	References	Test Setup	Prerequisites	Test Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts

Module 6: Product Filter Functionality											
TC_HOME_FILTER_001	Verify filtering products by Availability, Composition, Brand, and Dimension using the sidebar menu	Verify that users can filter products successfully using multiple sidebar filter options such as Availability, Composition, Brand, and Dimension.	PrestaShop Demo Front Office	Launch a supported browser and navigate to the homepage product category section.	User is on the Home Page with product listings available	1. Open Home Page2. Locate and click on either clothes, accessories, or Arts. Sidebar Menu. Apply Availability filter4. Apply Composition filter5. Apply Brand filter6. Apply Dimension filter	Products should be filtered correctly based on the selected criteria	Filters applied successfully and products updated accordingly	Pass	High	
TC_HOME_FILTER_002	Verify Availability filter functionality	Verify that the Availability filter displays products according to selected stock availability options.	PrestaShop Demo Front Office	Open the homepage and navigate to a product category page.	User is on Home Page	1. Locate and click either clothes, accessories, or Arts. Sidebar Menu. Select the Availability filter option	The product list should update based on availability	Filter works correctly	Pass	Medium	
TC_HOME_FILTER_003	Verify Composition filter functionality	Verify that the Composition filter correctly displays products matching the selected composition type.	PrestaShop Demo Front Office	Navigate to a category page with filter options available.	User is on Home Page	1. Locate and click either clothes, accessories, or Arts. Sidebar Menu. Select Composition filter	The product list should update based on composition	Filter works correctly	Pass	Medium	
TC_HOME_FILTER_004	Verify Brand filter functionality	Verify that the products displayed are filtered correctly according to the selected brand option.	PrestaShop Demo Front Office	Open the category page containing products and sidebar filters.	User is on Home Page	1. Locate and click either clothes, accessories, or Arts. Sidebar Menu. Select Brand filter	The product list should update based on the selected brand	Filter works correctly	Pass	Medium	
TC_HOME_FILTER_005	Verify Dimension filter functionality	Verify that the Dimension filter displays products matching the selected size or dimension criteria.	PrestaShop Demo Front Office	Open the product category page in a supported browser.	User is on Home Page	1. Locate and click either clothes, accessories, or Arts. Sidebar Menu. Select Dimension filter	The product list should update based on the selected dimension	Filter works correctly	Pass	Medium	

Module 7: Product Page Testing											
TC ID	Title	Description	References	Test Setup	Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts	
PROD_001	Verify the product details page	Verify that the product details page displays complete and	PrestaShop Demo Front Office	Launch a supported browser and navigate to a product listing page.	Open a product	Product details display correctly	Standalone product page resolves cleanly. Structured information fields	PASS	High	UI layouts align correctly across screen configurations.	

Module 7: Product Page Testing										
		accurate product information when a product is opened.					(Product Title, Current Price, Description text block, Size/Color selection fields, and Stock availability indicator) render properly.			
PROD_002	Verify image zoom	Verify that the product image zoom functionality works properly when hovering over the image.	PrestaShop Demo Front Office	Open a product details page with product images available.	Hover over the image	Image zoom should work	Hovering highlights focal magnification elements. Clicking the primary graphic triggers a high-resolution lightbox modal overlay framework to display crisp detailing.	PASS	Medium	Lightbox controls switch cleanly when testing multi-image sets.
PROD_003	Verify Add to Cart	Verify that users can successfully add a product to the shopping cart from the product details page.	PrestaShop Demo Front Office	Open a product details page.	Click Add to Cart	Product added successfully	A modal pop-up overlay activates smoothly with a green validation checkmark stating: "Product successfully added to your shopping cart". Total item count increments automatically.	PASS	Critical	Cart validation and checkout routing buttons function as intended.

Module 8: Shopping Cart Testing										
TC ID	Title	Description	References	Test Setup	Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
CART_001	Verify cart icon update	Verify that the shopping cart icon updates correctly after adding products to the cart.	PrestaShop Demo Front Office	Launch the browser and add at least one product to the cart.	Add item to cart	Cart count increases	The item counter badge embedded inside the global header shopping cart block immediately updates from (0) to (1) to accurately mirror selected items.	PASS	High	Badge renders numerical values accurately without page refreshes.
CART_002	Verify quantity update	Verify that updating product quantity in the cart dynamically updates	PrestaShop Demo Front Office	Add product(s) to the shopping cart and open the cart page.	Increase/decrease quantity	Price updates dynamically	The line-item price calculation runs sub-total adjustments seamlessly via an AJAX	PASS	High	Dynamic total calculation updates math values cleanly.

MODULE 8: SHOPPING CART TESTING										
		pricing and totals.					background call. The final summary block reflects the changed checkout values instantly.			
CART_003	Verify empty cart behavior	Verify that the system displays an appropriate empty cart message when all products are removed.	PrestaShop Demo Front Office	Add products to the shopping cart.	Remove all products	Cart empty message displays	The active checkout grid unloads. The system populates a clean status feedback text block reading: "There are no more items in your cart". Checkout buttons disable.	PASS	Medium	State transitions to empty cleanly without crashing the frame.

MODULE 9: CHECKOUT TESTING(Walk through)										
TC ID	Title	Description	References	Test Setup	Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
CHECKOUT_001	Verify checkout and Amount	Verify that guest and registered users can proceed through checkout successfully and that the displayed amount is accurate.	PrestaShop Demo Front Office	Add product(s) to the cart and proceed to the checkout page.	Proceed without login (Guest) / as registered user	Guest checkout works, and the amount is correct	The checkout funnel opens step panels without an account requirement. Line items, shipping estimates, and tax logic calculate accurate values.	PASS	High	Bypasses registration to parse delivery options cleanly.
CHECKOUT_002	Verify checkout for the product with a discount	Verify that discounted products apply the correct discount amount during checkout for guest and registered users.	PrestaShop Demo Front Office	Add the discounted product to the cart and proceed to checkout.	Proceed without login (Guest) /as registered user Pick a product discount	Guest checkout works, and the discount amount applied is correct	The order summary block clearly displays the original base item price, isolates the exact percentage markdown extraction line item, and prints the correct reduced value.	PASS	High	Markdown calculation formula registers flawlessly.

MODULE 9: CHECKOUT TESTING (Walk through)										
CHECKOUT_003	Verify payment selection	Verify that users can select and activate a preferred payment method during checkout.	PrestaShop Demo Front Office	Proceed to the payment section during the checkout process.	Choose payment method	Payment option activates	Activating a payment choice radio button expands its accordion card panel seamlessly to reveal conditional inline context and unblocks the primary confirmation submission command.	PASS	Critical	Mandatory option selection acts as an explicit gatekeeper.
CHECKOUT_004	Verify order confirmation	Verify that the system displays a successful order confirmation after completing checkout.	PrestaShop Demo Front Office	Complete the checkout process with valid order details.	Complete order	Order confirmation displays	The funnel unloads and loads a persistent receipt summary page stating: "YOUR ORDER IS CONFIRMED". The system prints a unique alphanumeric reference code and lists order invoice metadata.	PASS	Critical	Confirms transaction completion and logs tracking state safely.

MODULE 9A: Cart, GUEST USER CHECKOUT TESTING (functional)											
Test Case ID	Title	Description	References	Test Setup	Prerequisites	Test Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
TC_CART_001	Verify the Continue Shopping Button redirects the user back to the Product Page	Verify that the Continue Shopping button redirects users back to the product browsing page after adding items to the cart.	PrestaShop Demo Front Office	Launch a supported browser and open a product page.	User is on Product Page	1. Add product to cart. Click the Cart icon. Click Continue Shopping	User returns to product page	User redirected successfully	Pass	High	OK

MODULE 9A: Cart, GUEST USER CHECKOUT TESTING (functional)											
TC_CHECKOUT_001	Verify the Guest User can proceed to Checkout	Verify that guest users can access and proceed through the checkout process without logging in.	PrestaShop Demo Front Office	Add product to cart.	Product added to cart	1. Add product to cart. Click Proceed to Checkout	The checkout page should open	Checkout opened successfully	Pass	Critical	OK

			High	Open

MODULE 10: RESPONSIVE/UI TESTING										
TC ID	Title	Description	References	Test Setup	Steps	Expected Result	Actual Result	Status	Priority	Notes / Artifacts
UI_001	Verify mobile responsiveness	Verify that the website layout adapts correctly on mobile devices without UI distortion.	PrestaShop Demo Front Office	Open the site on a mobile device or mobile emulator	Open on mobile	Layout adapts properly	Grid containers stack cleanly down to a vertical scroll layout. The top navigation row wraps smoothly into a fully functional sliding hamburger overlay menu icon.	PASS	High	Checked across common mobile screen width variants.
UI_002	Verify image rendering	Verify that product images display correctly across different pages and screen sizes.	PrestaShop Demo Front Office	Open product listing or product detail pages	Load product pages	Images render properly	All image assets automatically scale dynamically using standard CSS relative sizing percentages. No aspect-ratio distortion or asset bleeding occurs.	PASS	Medium	Aspect layout scaling logic remains perfectly intact.
