**URL under Test:** <https://demo.prestashop.com/?view=front#/en/front>

| MODULE 1: HOMEPAGE TESTING |                                    |                                                                                                                                  |                                              |                                                                       |                                                                          |                                              |                                                         |
|----------------------------|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|-----------------------------------------------------------------------|--------------------------------------------------------------------------|----------------------------------------------|---------------------------------------------------------|
| TC ID                      | Test Name                          | Description                                                                                                                      | References                                   | Test Setup                                                            | Prerequisites                                                            | Test Steps                                   | Expected Result                                         |
| HOME_001                   | Verify homepage loads successfully | Verify that the PrestaShop front office homepage loads completely without broken UI elements, script errors, or missing content. | <a href="#">PrestaShop Demo Front Office</a> | Launch a supported browser (Chrome/Edge) and connect to the internet. | The browser is installed, and a stable internet connection is available. | Open the application URL                     | Homepage loads without errors                           |
| HOME_002                   | Verify logo visibility             | Verify that the store logo is visible on the homepage header and properly rendered.                                              | <a href="#">PrestaShop Demo Front Office</a> | Open the PrestaShop demo homepage in a supported browser.             | User successfully accessed the homepage.                                 | Observe the top-left section                 | The store logo should display properly                  |
| HOME_003                   | Verify homepage banner carousel    | Verify that the homepage banner slider rotates correctly when navigation arrows are clicked.                                     | <a href="#">PrestaShop Demo Front Office</a> | Open the homepage and ensure banner images are visible.               | The homepage is fully loaded.                                            | Click the next/previous arrows on the slider | Banner images should rotate correctly                   |
| HOME_004                   | Verify featured products display   | Verify that featured products are displayed with their product images, names, and prices on the homepage.                        | <a href="#">PrestaShop Demo Front Office</a> | Launch the browser and navigate to the homepage.                      | The homepage is accessible and loaded completely.                        | Scroll through the homepage                  | Featured products should display with images and prices |
| HOME_005                   | Verify navigation menu             | Verify that navigation menu links redirect users to the appropriate category or section pages.                                   | <a href="#">PrestaShop Demo Front Office</a> | Open the PrestaShop demo homepage in a supported browser.             | The homepage is loaded successfully.                                     | Click menu categories                        | The user should navigate to the selected category page  |

| MODULE 2: USER REGISTRATION |                                                   |                                                                                                                       |                                              |                                                                                           |                                      |                                                              |                                                                                                                                                                                                        |
|-----------------------------|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|----------------------------------------------|-------------------------------------------------------------------------------------------|--------------------------------------|--------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| TC ID                       | Test Title                                        | Description                                                                                                           | References                                   | Test Setup                                                                                | Prerequisites                        | Test Steps                                                   | Expected Result                                                                                                                                                                                        |
| UREG_001                    | Verify the Create Account page loads successfully | Verify that the account registration page loads correctly and displays all required registration fields and controls. | <a href="#">PrestaShop Demo Front Office</a> | Launch a supported browser (Chrome/Edge) and navigate to the Sign-up/Create Account page. | User is on the Sign up page.         | 1. Open the registration page.<br>2. Observe all form fields | <ul style="list-style-type: none"><li>Page loads successfully.</li><li>All fields are visible (Social Title, First Name, Last Name, Email, Password, Birthdate, Checkboxes, Sign up button).</li></ul> |
| UREG_002                    | Verify Social Title selection                     | Verify that users can select only one social title option at a time during registration.                              | <a href="#">PrestaShop Demo Front Office</a> | Open the registration form in a supported browser.                                        | The registration form is accessible. | 1. Open form.<br>2. Select "Mr."<br>3. Select "Mrs."         | <ul style="list-style-type: none"><li>Only one option can be selected at a time.</li><li>Selected option is highlighted.</li></ul>                                                                     |
| UREG_003                    | Validate First Name field (valid input)           | Verify that the First Name field accepts valid alphabetic input without validation errors.                            | <a href="#">PrestaShop Demo Front Office</a> | Open the registration form.                                                               | User is on the Create Account page.  | 1. Enter Theo.<br>2. Submit form.                            | <ul style="list-style-type: none"><li>Accepts input.</li><li>No validation error.</li></ul>                                                                                                            |

| MODULE 2: USER REGISTRATION |                                           |                                                                                                       |                                              |                                                           |                                                            |                                                                                                                                                   |                                                                                                                                                                  |
|-----------------------------|-------------------------------------------|-------------------------------------------------------------------------------------------------------|----------------------------------------------|-----------------------------------------------------------|------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| UREG_004                    | Validate First Name field (invalid input) | Verify that invalid characters and numbers are rejected in the First Name field.                      | <a href="#">PrestaShop Demo Front Office</a> | Open the registration form.                               | User is on the Create Account page.                        | Test Data: Theo123, @Theo, Theo!                                                                                                                  | <ul style="list-style-type: none"><li>display an Error message</li><li>Form submission blocked.</li></ul>                                                        |
| UREG_005                    | Validate Last Name field rules            | Verify that the Last Name field accepts only valid characters such as letters, spaces, and dots.      | <a href="#">PrestaShop Demo Front Office</a> | Open the registration form in a browser.                  | The registration page is loaded successfully.              | 1. Enter Ilaya.<br>2. Enter Ilaya123.                                                                                                             | <ul style="list-style-type: none"><li>Accepts only letters, dot (.), and space.</li><li>Rejects numbers and special characters.</li></ul>                        |
| UREG_006                    | Verify Email field validation             | Verify that the Email field validates proper email address formats and rejects invalid formats.       | <a href="#">PrestaShop Demo Front Office</a> | Launch the browser and open the registration page.        | User is on the account creation page.                      | Test Data: <ul style="list-style-type: none"><li>user@example.com (valid)</li><li>userexample.com (invalid)</li><li>user@.com (invalid)</li></ul> | <ul style="list-style-type: none"><li>Valid email accepted.</li><li>Invalid email shows an error message.</li></ul>                                              |
| UREG_007                    | Verify Password field                     | Verify that the Password field masks entered characters and accepts a valid password format.          | <a href="#">PrestaShop Demo Front Office</a> | Open the Create Account form.                             | The registration form is accessible.                       | 1. Enter password Test@1236.                                                                                                                      | <ul style="list-style-type: none"><li>Password is masked.</li><li>Accepts valid password format.</li><li>Enforces strength requirements if rules exist</li></ul> |
| UREG_008                    | Verify the birthdate field format         | Verify that the Birthdate field accepts only a valid MM/DD/YYYY date format.                          | <a href="#">PrestaShop Demo Front Office</a> | Open the registration form in a browser.                  | User is on the Sign-up page.                               | 1. Enter 05/31/1970.<br>2. Enter an invalid format 31-05-1970.                                                                                    | <ul style="list-style-type: none"><li>Accepts only MM/DD/YYYY format.</li><li>Invalid format rejected with an error.</li></ul>                                   |
| UREG_009                    | Verify Birthdate is optional              | Verify that users can complete registration without entering a birthdate value.                       | <a href="#">PrestaShop Demo Front Office</a> | Open the registration page.                               | All required fields except Birthdate are filled correctly. | 1. Leave Birthdate empty.<br>2. Submit form.                                                                                                      | <ul style="list-style-type: none"><li>Form submits successfully (if all required fields are valid).</li></ul>                                                    |
| UREG_010                    | Verify Terms and Conditions checkbox      | Verify that registration cannot proceed unless the Terms and Conditions checkbox is selected.         | <a href="#">PrestaShop Demo Front Office</a> | Open the account registration form.                       | User has entered valid registration details.               | 1.
